

Three Techniques for Improving Luck and Purifying the Mind

Hiroshi Tasaka, Author

The essence of luck revealed by the latest findings in quantum science

Is the quantum vacuum the true nature of deities?

The author received a scientific education and worked as a researcher in engineering at a university for many years. His career is founded on research based on a materialistic worldview. However, during his 71 years of life so far, the author has experienced many events that could not be described as anything but luck. As a result, he has become convinced that the existence of something called luck is undeniable. He hopes to clarify the scientific basis of luck, if any, from his standpoint as a scientific researcher. In this book, he introduces scientific hypotheses regarding the basis of luck. One of these hypotheses involves the quantum vacuum and the zero-point field.

Why is positive thinking counterproductive?

We may try to fill our mental landscapes with positive thoughts in an attempt to attract good luck, but many negative thoughts are already lurking deep in our minds. If we simply try to have positive thoughts without getting rid of the negative thoughts, the power of our positive thoughts will be counteracted by the power of the negative thoughts that are already present in our minds. By nature, our minds have two opposite poles, which means that when we try to force ourselves to have positive thoughts, it actually gives rise to negative thoughts in the unconscious realm. That is why positive thinking so frequently turns out to be counterproductive.

Profile of the Author

Hiroshi Tasaka

Born in 1951, the author graduated from the University of Tokyo in 1974, and completed his graduate studies there in 1981, earning a Ph.D. in nuclear engineering. He was a visiting researcher at the Battelle Memorial Institute, a U.S. think tank, in 1987. He helped to establish the Japan Research Institute in 1990 and has served in several capacities including director. He became a professor at Tama Graduate School of Business in 2000 and founded the think-tank SophiaBank in the same year, serving as its representative. The Japan Society selected him as a U.S.-Japan Innovator in 2005. He became a member of the Global Agenda Council of the World Economic Forum (Davos conference) in 2008. He was appointed president of the Club of Budapest in Japan in 2010. In 2011, he became a special advisor to the prime minister in relation to the Great East Japan Earthquake. In 2013, he established Tasaka Juku, where 7,300 leaders and CEOs gather from all over Japan to grow into change leaders of the 21st century. He has authored more than 90 books.

Table of Contents

Preface: What everyone believes even though it's said to be unscientific

The real reason why we cannot attract good luck

Part 1 The sole condition for attracting good luck

Unexpected words used by people who are successful in life

The sole condition for attracting good luck, which people worldwide have always talked about

Part 2 Five mental realms that attract good luck

Why good luck flees people who are always complaining
80% of our communication is non-verbal
The real reason why mood-makers are valued
People who want to be happy but attract unhappiness
Why we can feel it when we are being watched
Why many similar crimes occur at the same time
Why people feel déjà vu, the sense of having seen something before
Why fortune-telling can be accurate
Why people can sometimes see the future
The essence of luck revealed by the latest findings in quantum science
Whether the future already exists
Whether our future and our fate are predetermined
Why our minds connect with the zero-point field
Why laws of attraction exist
Whether life after death, memories of past lives, and reincarnation are merely superstitions
What really are the deities so many people have always believed in
Why the latest scientific findings match ancient religious insights
Why geniuses feel that ideas come to them from above
The unconscious is merely an entrance to a deeper mental realm

Part 3 Why conventional methods for changing the unconscious are not effective

Why our minds are constantly dominated by negative thoughts
During a lifetime, we fulfill only a tiny fraction of our potential
The positive and the negative arise simultaneously in the mental realm, as well as in the electrical realm
Special people whose minds harbor no negative thoughts
Three techniques for filling the mind with positive thoughts
Techniques for simultaneously overcoming illness, developing talent, and improving luck

Part 4 Techniques for purifying unconscious negative thoughts

Nature has great power to purify the unconscious realm
A true meditative state is something that happens naturally
Casual, everyday words can permeate the unconscious
Words that criticize or reject others will come back to the speaker
Using the words of three senses to attract good luck
Why just saying words can change the mind
Many negative thoughts arise out of relationships
Within your own mind, speak words of gratitude and become reconciled with everyone
Why words of gratitude can significantly change minds
A technique you can start using right away for reconciliation with people you dislike
Blaming others causes mental pain to ourselves

Part 5 Techniques that turn negative life experiences into something positive

Everyone has experienced success in their lives
Experiences of success are accompanied by music that can purify the unconscious realm
Realizing that you yourself are a lucky person

Good luck that shows up in the guise of bad luck
The power to interpret one's life is what attracts good luck
Gratitude brings out the greatest powers of interpretation
Past experiences of failure were actually experiences of success
The instant when an event that seemed unlucky takes on a positive significance
Becoming grateful for the lucky lives we have been given
Everyone has experienced ultimate success in their lives
Gratitude for being born in a certain time and country
Knowing that being alive is a miracle

Part 6 Techniques for acquiring the ultimate positive outlook on life

Believing that one's own life is guided by something greater
Considering all life events to be deeply significant
Accepting that we are a factor in every problem of our lives
Accepting that something greater is trying to help us grow
Why good luck comes to people with aspirations and a sense of mission
Being sure of receiving all the wisdom to overcome adversity
Why praying with all your might doesn't work
The ultimate technique for praying without producing negative thoughts

Conclusion: Improving your luck and enhancing your mind
